

Angela Taylor is the Treasurer of the Executive Board for CARE.

I met Sandi about 3 years ago when we both volunteered to work on the Negotiated Rule Making team. Carpooling together for 2 years allowed us to really get to know each other. I respect Sandi enormously for her volunteerism, dedication and commitment to providers.

Since CARE was founded, I have been working with Sandi proofreading and suggesting wording changes as well as being there to bounce ideas off of.

The advocacy work that care offers by its knowledge base is unmatched anywhere. CARE offers what no other entity can with its experience, expertise and compassion for understanding. I believe strongly in care's mission as it makes a huge difference in both the pictures of the smaller community (child, parent, family and provider) to how it affects our state community as a whole.

Much work still needs to be done but progress is visible. I am all for empowering, educating and seeking justice for those who have been wronged.
